

UNITED STATES DEPARTMENT OF THE INTERIOR
Bureau of Land Management
P. O. Box 36800
Billings, Montana 59107

OIL AND GAS LEASE STIPULATIONS

ESTHETICS--To maintain esthetic values, all surface-disturbing activities, semipermanent and permanent facilities may require special design including location, painting and camouflage to blend with the natural surroundings and meet the intent of the visual quality objectives of the Federal Surface Managing Agency (SMA).

EROSION CONTROL--Surface-disturbing activities may be prohibited during muddy and/or wet soil periods.

CONTROLLED OR LIMITED SURFACE USE STIPULATION --This stipulation may be modified, consistent with land use documents, when specifically approved in writing by the Bureau of Land Management (BLM) with concurrence of the SMA. Distances and/or time periods may be made less restrictive depending on the actual onground conditions. The prospective lessee should contact the SMA for more specific locations and information regarding the restrictive nature of this stipulation.

The lessee/operator is given notice that the lands within this lease may include special areas and that such areas may contain special values, may be needed for special purposes, or may require special attention to prevent damage to surface and/or other resources. Possible special areas are identified below. Any surface use or occupancy within such special areas will be strictly controlled, or **if absolutely necessary**, excluded. Use or occupancy will be restricted only when the BLM and/or the SMA demonstrates the restriction necessary for the protection of such special areas and existing or planned uses. Appropriate modifications to imposed restrictions will be made for the maintenance and operations of producing oil and gas wells.

After the SMA has been advised of specific proposed surface use or occupancy on the leased lands, and on request of the lessee/operator, the Agency will furnish further data on any special areas which may include:

100 feet from the edge of the rights-of-way from highways, designated county roads and appropriate federally-owned or controlled roads and recreation trails.

500 feet, or when necessary, within the 25-year flood plain from reservoirs, lakes, and ponds and intermittent, ephemeral or small perennial streams: 1,000 feet, or when necessary, within the 100-year flood plain from larger perennial streams, rivers, and domestic water supplies.

500 feet from grouse strutting grounds. Special care to avoid nesting areas associated with strutting grounds will be necessary during the period from March 1, to June 30. One-fourth mile from identified essential habitat of state and federal sensitive species. Crucial wildlife winter ranges during the period from December 1 to May 15, and in elk calving areas during the period from May 1 to June 30.

300 feet from occupied buildings, developed recreational areas, undeveloped recreational areas receiving concentrated public use and sites eligible for or designated as National Register sites.

Seasonal road closures, roads for special uses, specified roads during heavy traffic periods and on areas having restrictive off-road vehicle designations.

On slopes over 30 percent or 20 percent on extremely erodable or slumping soils.

Standard (September 1998)

See Notice on Back

NOTICE

APPLICATIONS FOR PERMIT TO DRILL (APDs)--The BLM district or resource area offices are responsible for the receipt, processing, and approval of APDs. The APDs are to be submitted by oil and gas operators pursuant to the requirements found in Onshore Oil and Gas Order No. 1 -- Approval of Operations on Onshore Federal and Indian Oil and Gas Leases (Circular No. 2538). Additional requirements for the conduct of oil and gas operations on federal oil and gas leases can be found in Code of Federal Regulations Title 43, Part 3160. Copies of Onshore Oil and Gas Order No. 1, and pertinent regulations, can be obtained from the BLM district offices in which the operations are proposed. Early coordination with these offices on proposals is encouraged.

CULTURAL AND PALEONTOLOGICAL RESOURCES--The SMA is responsible for assuring that the leased lands are examined to determine if cultural resources are present and to specify mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the SMA, shall:

1. Contact the appropriate SMA to determine if a site-specific cultural resource inventory is required. If an inventory is required, then:
2. Engage the services of a cultural resource specialist acceptable to the SMA to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation which may result from environmental or other considerations. An acceptable inventory report is to be submitted to the SMA for review and approval no later than that time when an otherwise complete application for approval of drilling or subsequent surface-disturbing operation is submitted.
3. Implement mitigation measures required by the SMA. Mitigation may include the relocation of proposed lease-related activities or other protective measures such as testing salvage and recordation. Where impacts to cultural resources cannot be mitigated to the satisfaction of the SMA, surface occupancy on that area must be prohibited.

The lessee or operator shall immediately bring to the attention of the SMA any cultural or paleontological resources discovered as a result of approved operations under this lease, and not disturb such discoveries until directed to proceed by the SMA.

ENDANGERED OR THREATENED SPECIES--The SMA is responsible for assuring that the leased land is examined prior to undertaking any surface-disturbing activities to determine effects upon any plant or animal species, listed or proposed for listing as endangered or threatened, or their habitats. The findings of this examination may result in some restrictions to the operator's plans or even disallow use and occupancy that would be in violation of the Endangered Species Act of 1973 by detrimentally affecting endangered or threatened species or their habitats.

The lessee/operator may, unless notified by the authorized officer of the SMA that the examination is not necessary, conduct the examination on the leased lands at his discretion and cost. This examination must be done by or under the supervision of a qualified resources specialist approved by the SMA. An acceptable report must be provided to the SMA identifying the anticipated effects of a proposed action on endangered or threatened species or their habitats.

NOTICE FOR LANDS OF THE NATIONAL FOREST SYSTEM
UNDER JURISDICTION OF
DEPARTMENT OF AGRICULTURE

The permittee/lessee must comply with all the rules and regulations of the Secretary of Agriculture set forth at Title 36, Chapter II, of the Code of Federal Regulations governing the use and management of the National Forest System (NFS) when not inconsistent with the rights granted by the Secretary of Interior in the permit. The Secretary of Agriculture's rules and regulations must be complied with for (1) all use and occupancy of the NFS prior to approval of an exploration plan by the Secretary of the Interior, (2) uses of all existing improvements, such as forest development roads, within and outside the area permitted by the Secretary of the Interior, and (3) use and occupancy of the NFS not authorized by an exploration plan approved by the Secretary of the Interior.

All matters related to this STIPULATION are to be addressed to:

Forest Supervisor, Helena National Forest
2880 Skyway Drive
Helena, MT 59601

who is the authorized representative of the Secretary of Agriculture.

CULTURAL AND PALEONTOLOGICAL RESOURCES - The FS is responsible for assuring that the leased lands are examined to determine if cultural resources are present and to specify mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator, unless notified to the contrary by the FS, shall:

1. Contact the FS to determine if a site-specific cultural resource inventory is required. If a survey is required, then:
2. Engage the services of a cultural resource specialist acceptable to the FS to conduct a cultural resource inventory of the area of proposed surface disturbance. The operator may elect to inventory an area larger than the area of proposed disturbance to cover possible site relocation which may result from environmental or other considerations. An acceptable inventory report is to be submitted to the FS for review and approval at the time a surface-disturbing plan of operation is submitted.
3. Implement mitigation measures required by the FS and the BLM to preserve or avoid destruction of cultural resource values. Mitigation may include relocation of proposed facilities, testing, salvage, and recordation or other protective measures. All costs of the inventory and mitigation will be borne by the lessee or operator, and all data and materials salvaged will remain under the jurisdiction of the U.S. Government as appropriate.

The lessee or operator shall immediately bring to the attention of the FS and the BLM any cultural or paleontological resources or any other objects of scientific interest discovered as a result of surface operations under this lease, and shall leave such discoveries intact until directed to proceed by the FS and the BLM.

FLOODPLAIN AND WETLANDS - The lessee is hereby notified that this lease may contain land within a riparian ecosystem. All activities within this area may be highly restricted in order to comply with Executive Order 11988 - *Floodplain Management* and Executive Order 11990 - *Protection of Wetlands*, in order to preserve and restore or enhance the natural and beneficial values served by floodplains and wetlands.

Riparian ecosystem, will be managed by the Forest Service to protect from conflicting uses in order to provide healthy, self-perpetuating plant and water communities that will have optimum diversity and density of understory and overstory vegetation. Occupancy and use of lands within riparian ecosystems proposed in a proposed Surface Use Plan of Operations will be considered in an environmental analysis done to identify the mitigation measures necessary to protect the riparian area. Special measures such as road design, well pad size and location or directional drilling, may be made part of the permit authorizing the activity.

USDA-FOREST SERVICE
THREATENED, ENDANGERED, AND SENSITIVE
PLANT OR ANIMAL SPECIES LEASE NOTICE

The lease area may contain threatened and endangered species or habitat necessary for the continued existence of threatened, proposed and endangered species which are protected by the 1973 Endangered Species Act, as amended (50 CFR 402). The lease area may also contain habitat or species, listed as sensitive, which may require protective measures to prevent them from being listed as threatened or endangered or result in a loss of viability or biological diversity (36 CFR 219.19 or 219.26). A biological evaluation of the leased lands may be required prior to surface-disturbance to determine if threatened, endangered, or sensitive plant or animal species or their habitat are present and to identify needed mitigation measures. Prior to undertaking any surface-disturbing activities on the lands covered by this lease, the lessee or operator shall:

1. Contact the Forest Service to determine if a biological evaluation is required (FSM 2670.31-32). The Forest Service is responsible for ensuring that the leased land is examined through a biological evaluation, prior to undertaking any surface-disturbing activities, to determine effects upon any plant or animal species listed or proposed for listing as threatened, endangered, or sensitive.
2. The lessee or operator may choose to conduct the evaluation on the leased lands at their discretion and cost. This biological evaluation must be done by or under the supervision of a qualified biologist/botanist approved by the Forest Service. An acceptable report must be provided to the Forest Service identifying the anticipated effects of a proposed action on threatened, endangered, or sensitive species. An acceptable biological evaluation is to be submitted to the Forest Service for review and approval no later than that time when an otherwise complete application for approval of drilling or subsequent surface-disturbing operation is submitted.
3. Implement mitigation measures required by the Forest Service. Mitigation may include the relocation of proposed lease-related activities or other protective measures. The findings of the biological evaluation may result in some restrictions to the operator's plans or even disallow use and occupancy to comply with the 1973 Endangered Species Act (as amended), threatened and endangered regulations and Forest Service regulations.

If threatened, endangered, or sensitive plant or animal species are discovered in the area after any required biological evaluation has concluded, an evaluation will be conducted to assess the effect of ongoing and proposed activities. Based on the conclusion drawn in the evaluation, additional restrictions or prohibitions may be imposed to protect the species or their habitats.

NOTICE

Lands contained within this (lease, license, permit, or contract) are subject to the Forest Service Interim Rule, "Administration of the Forest Development Transportation System: Temporary Suspension of Road Construction and Reconstruction in Unroaded Areas"; Federal Register/Vol. 64, No. 29/Friday, February 12, 1999, pages 7290 through 7305. These lands will also be subject to the final road management policy which will be set within 18 months.

No road construction will be allowed within the unroaded area until the Forest Service adopts its revised road management policy or 18 months from the effective date of this final interim rule, whichever is sooner.

Bureau of Land Management
Montana State Office

CONTROLLED SURFACE USE STIPULATION

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance, prairie dog colonies and complexes 80 acres or more in size will be examined to determine the absence or presence of black-footed ferrets. The findings of this examination may result in some restrictions to the operator's plans or may even preclude use and occupancy that would be in violation of the Endangered Species Act (ESA) of 1973.

The lessee or operator may, at their own option, conduct an examination on the leased lands to determine if black-footed ferrets are present, or if the proposed activity will have an adverse effect, or if the area can be cleared. This examination must be done by or under the supervision of a qualified resource specialist approved by the Surface Management Agency (SMA).

An acceptable report must be provided to the SMA documenting the presence or absence of black-footed ferrets and identifying the anticipated effects of the proposed action on the black-footed ferret and its habitat. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 2 N, R 60 E, PMM
Sec. 32: SENW

For the purpose of:

To assure compliance with the Endangered Species Act (ESA) by locating and protecting black-footed ferrets and their habitat.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CSU (September 1998)

Parcel No. 13N-01W-001

Serial No.

CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

Proposed activities would be required to be located or designed to meet the visual quality objectives of retention midground, retention background, or partial retention within one year of completing operations.

On the lands described below:

T 13 N, R 1 W, PMM
Sec 24: W2NW; Portions of SWNE, E2NW, N2SW, NWSE

For the purpose of:

To ensure that the visual quality of the area is maintained. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-28 and Record of Decision, p. 15).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

NO SURFACE OCCUPANCY STIPULATION

No surface occupancy or use is allowed on the lands described below (legal subdivision or other description).

1. T 14 N, R 7 W, PMM
Sec 22: Portions of SENE, E2SE

2. T 14 N, R 7 W, PMM
Sec 3: Portions of SWSW
Sec 10: Portions of NWNW, W2SW
Sec 15: Portions of NE, N2NW, SWNW, NESW, N2SE, SESE
Sec 22: Portions of NE, S2NW, NESW, SWSW, N2SE, SESE

For the purpose of:

1. To require that activities not be located within 1/2 mile of the Continental Divide in order to protect features important to the suitability of the Continental Divide as a biological corridor. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-11 and Record of Decision, p. 11).

2. To preclude construction of well sites, but allow related facilities such as roads and pipelines on slopes between 40 and 60 percent, and to preclude surface disturbing activities on sensitive soils that have a high erosion/stability hazard (including wetlands) which would be difficult to reclaim. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-30 and Record of Decision, p. 15).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

To preclude surface disturbing activities, including interrupting drilling operations, within the big game winter range which could cause displacement of prey animals for wolf during the critical time period. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-20 and Record of Decision, p. 13).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Parcel No. 14N-07W-003

Serial No.

CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

Coordination of surface disturbing activities associated with field development and/or other limitations to spread surface disturbance activities over time and space within big game winter range areas.

On the lands described below:

T 14 N, R 7 W, PMM
Sec 11: W2NW, SW, W2SE; portions of SESE
Sec 14: N2NW; portions of N2NE, SWNE, S2NW

For the purpose of:

To avoid or minimize the potential for adverse effects to big game species. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-6 and Record of Decision, p. 10).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

No surface use is allowed during the following time period(s). This stipulation does not apply to operation and maintenance of production facilities.

June 1 to September 30

On the lands described below:

T 14 N, R 7 W, PMM

Sec 26: N2NW, SWNW; portions of NWNE, SENW, N2SW, SWSW

Sec 34: Portions of N2NE, SWNE, NENW

Sec 35: Lot 4, E2NE

Sec 36: Lot 2; portions of Lots 1, 3, 4, S2NW

For the purpose of (reasons):

To preclude surface disturbing activities, including interrupting drilling operations, within big game summer range which could cause increased stress and/or displacement of animals during the critical time period (June 1 to September 31) to insure big game animals have areas of security that provide habitat components needed to keep animals healthy as they go into breeding period and hunting season. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-8 and Record of Decision, p. 10).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Parcel No. 14N-07W-006

Serial No.

TIMING LIMITATION STIPULATION

No surface use is allowed during the following time period(s). This stipulation does not apply to operation and maintenance of production facilities.

April 15 to June 30

On the lands described below:

T 14 N, R 7 W, PMM
Sec 25: All
Sec 26: All
Sec 34: Lots 1,4,N2N2; portions of Lots 2,3,S2N2
Sec 35: Lots 1,4,N2; portion of Lots 2,3
Sec 36: Lots 1-4,N2

For the purpose of (reasons):

To preclude surface disturbing activities within the big game birthing areas which could cause increased stress and/or displacement during the critical time period. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-7 and Record of Decision, p. 8).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

Proposed activities would be required to be located or designed to meet the visual quality objectives of retention midground, retention background, or partial retention within one year of completing operations.

On the lands described below:

T 14 N, R 7 W, PMM

Sec 25: SESW, SE; portions of NE, SENW, NESW, SWSW

Sec 26: N2NW, SWNW; portions of W2NE, SENW, N2SW, SWSW, S2SE

Sec 34: Portions of N2NE, SWNE, NENW

Sec 35: Lots 2-4, E2NE; portions of Lot 1, W2NE, NW

Sec 36: Lots 1-4, N2

For the purpose of:

To ensure that the visual quality of the area is maintained. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-28 and Record of Decision, p. 15).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

Parcel No. 14N-07W-006

Serial No.

CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

Activities within important bull trout and west slope cutthroat drainages may be relocated, may have special design criteria, and additional on and off-site mitigation measures to prevent the regional viability of native trout populations from being decreased from oil and gas activities.

On the lands described below:

T 14 N, R 7 W, PMM

Sec 26: Portions of N2NW, SWNW, W2SW

Sec 34: N2NW; portions of Lot 1, N2NE, SWNE, S2NW

For the purpose of:

Surface disturbance within these areas could adversely affect sensitive trout viability. (Helena National Forest and Elkhorn Mountains portion of the Deerlodge National Forest Oil and Gas EIS, Appendix C-21 and Record of Decision, p. 13).

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CONTROLLED SURFACE USE STIPULATION

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullyng, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 1 S, R 58 E, PMM
Sec. 2: LOTS 1,2,3,4
2: S2NW,N2SW,NWSE

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING LIMITATION STIPULATION

Serial No.

Surface use is prohibited from March 1 to June 15 in grouse nesting habitat within 2 miles of a lek. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 9 S, R 61 E, PMM
Sec. 3: W2NE, NW, S2

For the purpose of (reasons):

To protect sharptail and sage grouse nesting habitat from disturbance during spring and early summer in order to maximize annual production of young and to protect nesting activities adjacent to nesting sites for the long-term maintenance of grouse populations in the area.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING (September 1998)

09-00-27

United States Department of the Interior

Montana State Office

CONTROLLED SURFACE USE STIPULATION

Serial No.

Surface occupancy or use is subject to the following special operating constraints.

Prior to surface disturbance on slopes over 30 percent, an engineering/reclamation plan must be approved by the authorized officer. Such plan must demonstrate how the following will be accomplished:

- Site productivity will be restored.
- Surface runoff will be adequately controlled.
- Off-site areas will be protected from accelerated erosion, such as rilling, gullying, piping, and mass wasting.
- Water quality and quantity will be in conformance with state and federal water quality laws.
- Surface-disturbing activities will not be conducted during extended wet periods.
- Construction will not be allowed when soils are frozen.

On the lands described below:

T 9 S, R 61 E, PMM
Sec. 12: ALL
13: ALL

For the purpose of:

To maintain soil productivity, provide necessary protection to prevent excessive soil erosion on steep slopes, and to avoid areas subject to slope failure, mass wasting, piping, or having excessive reclamation problems.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

TIMING LIMITATION STIPULATION

Serial No.

Surface use is prohibited from December 1 to March 31 within crucial winter range for wildlife. This stipulation does not apply to the operation and maintenance of production facilities.

On the lands described below:

T 9 S, R 61 E, PMM
Sec. 12: All
13: All
14: All

For the purpose of (reasons):

To protect crucial white-tailed deer, mule deer, elk, antelope, moose, bighorn sheep, and sage grouse winter range from disturbance during the winter use season, and to facilitate long-term maintenance of wildlife populations.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)

CONTROLLED SURFACE USE STIPULATION

Surface occupancy or use is subject to the following special operating constraints:

Oil and gas operations will be controlled to minimize impacts (e.g. visual, audio, etc.) in the area around developed recreation sites. Measures taken to accomplish this may be the utilization of vegetative/topographic screening factors, matching color tones of facilities with surrounding area, orienting the well pad/facilities to minimize size and movement, using prescribed sizes of tanks and other production facilities, and requiring audio constraints.

On the lands described below:

T 143 N, R 100 w, 5th PM
Sec 13: Portions of SW

For the purpose of:

To meet the goals and management standards for developed recreation sites (Management Area F, Custer Forest Plan, pages 83-84); to maintain and enhance the recreation opportunity including the visual setting. To minimize the effects of operations activities in the area around this developed recreation site.

Any changes to this stipulation will be made in accordance with the land use plan and/or the regulatory provisions for such changes. (For guidance on the use of this stipulation, see BLM Manual 1624 and 3101 or FS Manual 1950 and 2820.)
